Atmos Energy to Flare Natural Gas in Lewisville

Lewisville, TX (February 14, 2014) – Atmos Energy crews and contractors will oversee a controlled natural gas flaring on February 18, 2014, beginning at approximately 8 a.m. at the intersection of Josey Ln. and Windhaven in Lewisville. The company will be replacing a section of natural gas pipeline in the area as part of normal, routine maintenance operations.

“Flaring” is a standard industry practice to safely burn natural gas that must be removed from a specific section of pipeline so that employees can work on the pipe. People in the area will notice a large, controlled flame and moderate noise for approximately three to four hours.

The Lewisville Fire Department, sheriff department, police department, city officials and 911 operators have been advised of the flaring.

About Atmos Energy

Atmos Energy Corporation, headquartered in Dallas, is one of the country's largest natural-gas-only distributors, serving over three million natural gas distribution customers in over 1,400 communities in eight states from the Blue Ridge Mountains in the East to the Rocky Mountains in the West. Atmos Energy manages company-owned natural gas pipeline and storage assets, including one of the largest intrastate natural gas pipeline systems in Texas and also provides natural gas marketing and procurement services to industrial, commercial and municipal customers primarily in the Midwest and Southeast.
